

Can We Keep It Together

Canada Climate Change Art

DW Studio

We have come this far as a species; we have met every challenge that has been thrown at us. We need to attack Climate Change with just as much courage as before to win this battle and make this world a better place.

Medium:
*Hardwood & Leather
Pyrography Art and Blue
wood stain.*

Name:
'Can We Keep It Together'

Finish:
Beeswax

Right Side

Left Side

The question is, 'What are we going to do about this issue?' that said, what am I going to do?

To us in DW Studio, it means being responsible and using no plastic in the studio, Recycling, Reduce and Reuse.

This artwork is made from discarded hardwood floor blanks that were destined to be burnt in a fire pit. The stain is from the Habitat for Humanity Restore; the wax finish is beeswax from a local New Brunswick beekeeper.

If we all do our part, this could be so much easier on all of us.
