Mother Nature is a combination of several disciplines; woodcarving, pyrography art & painting. I am combining all of them together to create a unique piece of art called 'Mother Nature.' Hand-made in our Oromocto, NB studio, 2021 as part of the Fredericton artist residency.

Mother Nature is seen as the guardian of our planet earth. This image represents how we see Mother Nature as part human and part earth or plant. That way, we can understand our connection and our responsibilities when it comes to taking care of our planet and our home.

Chimo!

Details of each individual maple leaf are carved and burned into this work of art. This extreme attention to detail gives it incredible depth.

This design is one of our many copyright (c) designs, and, as such, it will never be massed produced, making it a true one-of-a-kind.
