# *Life Line*

## *Representational Art*

*This is a representation of a lifeline. The line that cuts through the center of the wood is life as we navigate time with curves and twists in the road that sends us on a fool's errand or onto a new life adventure. Starting at the top from birth, our road is twisting and turning to the bottom with old age where the road is less dramatic, we hope. The leather is the decisions and things we do to keep it all together. Even though our decisions are not the best course of action from time to time, they are what builds us and makes us who we are.*
